EXPERIENCE

Freelance Software Engineer and Mentor, Codementor – September 2023 to present

- Clients schedule mentoring sessions with me for expert guidance in software development.
- Provide code reviews, write code for various projects, and debug issues.

Software Engineer, iFit – December 2020 to November 2022

- Contributed to a consumer-facing embedded and mobile application with over 6 million users, focusing on high visibility sections like the home, pre, and post workout screens.
- Created new features, implemented microservices, managed microservices and APIs, fixed bugs, performed code reviews, and refactored code using agile methodologies.
- Primarily used TypeScript, AWS (Lambda, S3, CloudWatch), React, React Query, Redux, Node.js.

Full Stack Web Developer, Kinetic Vision – July 2019 – August 2020

- Worked on a variety of projects for P&G as well as smaller companies, often learning new languages and frameworks on the job such as Python, Tornado, and server management.
- Led the full scope of multiple projects when working with only co-ops, which included planning, estimating, development, code review, meetings with clients, documentation, testing, and deployment.
- Consulted with clients to plan new features, review progress, estimate timelines, and come up with next steps.

Developer Apprentice, 84.51°/Launch Scout – November 2018 - May 2019

- Full-time apprenticeship at 84.51° with a mentor from Launch Scout that taught best practices and new skills.
- Contributed to enterprise-level production code for Kroger's internal marketing platform while learning Java, Spring Boot, Angular, integration testing, end-to-end testing, and much more on the job.
- Developed a solid understanding of design patterns, data structures, and algorithmic problem solving by participating in book clubs, working on side projects, and completing algorithm challenges weekly.

EDUCATION

Fullstack Academy, Chicago, Illinois - Software Engineering Immersive Bootcamp — January 2018 - May 2018

- 17 weeks (about 4 months) long, top ranked, intensive, full-time, fullstack JavaScript web development bootcamp.

University of Illinois at Urbana-Champaign - Bachelor of Science in Kinesiology — August 2012 - May 2016

TECHNICAL SKILLS

Primary – JavaScript, TypeScript, SQL, HTML/CSS, automated software testing, data structures, microservices, React, Redux, Node, Express, RESTful APIs, GraphQL, authentication, authorization, ORMs, Version Control (Git).

Secondary – Python, Java, React Native, Angular, Django, Tornado, Spring Boot, GraphQL, Databases (SQL, NoSQL, MySQL, Oracle DB, PostgreSQL, MongoDB), DevOps, AWS Cloud, TDD, Docker.

PROJECTS

Top 5 Dating App (solo project - current) - github.com/rawarne2/top-five - github.com/rawarne2/top-five-backend

- React Native, TypeScript, Python, Django, AWS, and MongoDB. Estimated completion is early 2024.

Nutri-Yum Mobile App (team project - 2018) - youtube.com/watch?v=C6Lc_XBkEWU

- React Native mobile application that tracks nutrition consumption through AI image analysis or manual search.
- Developed by a team of 4 during a 2-week period at Fullstack Academy as my Capstone Project.

LCA Residential Properties Website (solo project - 2020) - lcaresidentialproperties.com

- Angular and Express.js website displaying information about my mom's rental properties and provides maintenance request form submissions through email. Desktop and mobile friendly. No longer in use after sale of buildings.

Portfolio Website (solo project - 2018) – rashaunwarner.com

- React personal website hosted in AWS S3 bucket. Needs updates.
