""Versatile developer with over 4 years of full stack development experience, specializing in JavaScript, TypeScript, Python, and React. Successfully transitioned from a career in health and fitness to build intuitive web and mobile applications that address complex challenges and enhance user experience."

Top Technical Skills

- Languages: JavaScript, TypeScript, Python, HTML, CSS, SQL, NoSQL
- Frameworks/Libraries: React, React Native, Next.js, Redux, Django, Node.js, Express.js, Jest, React Testing Library
- Tools/Databases: AWS, Docker, REST, GraphQL, Git, PostgreSQL, MongoDB, SQLite, API, microservices
- Other Skills: Agile Methodologies, Scrum, Debugging, Mentoring, Testing (Unit, Integration, End-to-End, Manual)

Experience

DataAnnotation Tech and Outlier – AI Model Trainer | Remote | Freelance | February 2024 – Present

- Training AI models by giving detailed feedback of model responses to code related topics.
- I use JavaScript, Python, and SQL to write code, create prompt details, and test model response on my own machine. I check for correctness, verbosity, formatting, alignment with prompt instructions, and more.

CodeMentor – Full Stack Software Engineer and Mentor | Remote | Freelance | 2023 – Present

- Provide live mentorship, code reviews, debugging help, and project guidance to aspiring software developers.

iFIT – Software Engineer | Remote | December 2020 – November 2022 (laid off – not performance related)

- Full stack development in prominent sections of embedded React app with over 6 million active users.
- Implemented new features such as translations and Workout Challenges, fixed critical bugs, and performed code reviews using TypeScript, AWS (Lambda, S3, CloudWatch), React, React Query, Redux, and Node.js. App was on mobile device or embedded in fitness equipment like treadmills, bikes, and rowers.
- Also used Agile Methodologies, incorporated microservices, lead the knowledge transfer of 3 frontend and 3 backend repos for prominent sections of the app.

Kinetic Vision – Full Stack Web Developer | Cincinnati, OH | July 2019 – August 2020

- Worked on full stack projects for 2 Fortune 100 companies as well as small companies, primarily using React, TypeScript, Python, Tornado, Apollo, Docker, SQLAlchemy, matplotlib, NumPy, REST, GraphQL, and PostgreSQL.
- After about 6 months of working with lead developer, I led 2 projects with 3 co-ops, managed client meetings, estimated timelines, wrote and reviewed code, mentored co-ops, tested, and deployed software.

84.51° / Launch Scout – Software Engineer Apprentice | Cincinnati, OH | November 2018 - May 2019

- Apprenticeship working on Kroger's precision marketing platform at 84.51 with a mentor from Launch Scout.
- I learned Java, Spring Boot, Angular, integration and end-to-end testing, design patterns, data structures, and algorithms while on the job from my mentor and by spending extra time studying and creating small side projects.

Education

Full Stack Academy of Code | Software Engineering Bootcamp Certification | Chicago, IL | 2018

- 17-week top-ranked coding bootcamp covering JavaScript, React, Redux, Express, Node, SQL, and much more.

University of Illinois at Urbana-Champaign | Bachelor of Science in Kinesiology | 2016

- I took general engineering my first two years, before declaring Kinesiology as my major.
- Resident Advisor of 60+ students for 3 years and competed on the cross-country club and track club teams.

Top Projects

Top 5 Dating App (solo) | GitHub Frontend, GitHub Backend

- I completely designed and developed the entire project from scratch myself with the goal of releasing it to the Apple App Store and Google Play Store. The main details of the project are private.
- A React Native mobile app using TypeScript, Python, Django, Expo, and PostgreSQL.
- It currently has Django authentication with JWTs and blacklisting, models, serializers, API routes, UI layout, color scheme, login screen, potential matches screen with card swiper, basic current matches screen, and much more.
